

One customer can have zero to many carts. A cart can have zero to many tickets OR concessions, but does not need to have both. Tickets are directly linked to movies, of which, one or many tickets can be placed.

(customers,tickets, concessions, movies at minimum but you can have more)
afterward create the tables.

Inside of your ERD please backup the reasoning behind why you decided to use the relationships you chose. You can do so by adding text to the bottom of the ERD.
